

ALBANY WEBS

Why should I start a website?

There are many reasons to start up a website, for a business, for your club, for your favorite hobby.

Isn't building a website expensive?

Well yes there are web design companies out there who take advantage of honest folks, the main reason this is possible is that most people do not have the knowledge to make the right decisions.

Empowering customers with knowledge.

We feel that giving our customers the knowledge they need to make the right decisions is the right thing to do.

Often many companies withhold this basic information as a method of making more money.

Example, buying a domain name ranges from \$35.00 per year to \$8.00 per year, yet there are many companies that will charge you the higher end of that range instead of the lower range, knowing that you can buy your domain name for less than ten dollars a year is part of the way we do business, we provide our customers with the information they need to save money.

We feel that it is more important to provide this knowledge than to make a few extra dollars in profit.

To get started, you need website space, bandwidth and a domain name and you are ready to begin.
